If in doubt, we will gladly advise you, if you write in and request the information.

Dear Customer:

We are glad to send you our 1951 Bulb Planting Guide; revised and brought up to date with today's most outstanding Tulip and Daffodil varieties and miscellaneous bulbs, to which we have added an outstanding list of the New Garden Iris.

We are celebrating our 25th anniversary as growers of domestic bulbs this year. During these 25 years we had to depend entirely on our own growing stock at times, but now we are offering both domestic and imported bulbs and are devoting our nurseries mainly to growing varieties which are strictly American or to varieties which we cannot obtain elsewhere.

We plan to continue this policy, and as I am writing these lines the thought occurred to me in regard to Tulip prices. The past few years many bargain offers are being made by radio and magazine advertisements, at prices that make our offerings look out of proportion. In fact last year an old customer wrote us, asking why the bottom had dropped out of Tulip bulb prices. Our answer is nursery stock in general and bulbs above all are regulated by the cost of labor which is consistently getting higher. Cost of all supplies used, freight and postage are constantly increased. The only way low priced offers can make a profit for the seller is by decreasing the value of the merchandise to the buyer. It always is our aim to give you top value in quality.

We wish to thank our customers for their continuous patronage and assure you we are always striving to deserve this trust.

Yours very truly,

NELIS NURSERIES INC.

Nelis Giant May-

The modern Giant May-Flowering Tulip is the result of three separate experiments of Tulip breeding, formerly classified as Darwin, Cottage and Breeder Tulips. Through the inter-breeding of the three beforementioned classes, the terms Darwin, Cottage (or Hybrid) and Breeder Tulips still listed in some catalogs have become so confusing that even among the best informed there are many clashes of opinion. Since the modern Giant May-Flowering Tulips contain the blood of all the three preceding crosses in proportion unknown to even the plant breeders themselves, it seems useless and scientifically meaningless. We, therefore, will list them as Giant May-Flowering Tulips. The term May-Flowering is based on our Michigan climate, and in southern locations the blooming period will, of course, be earlier. In revising our lists for 1951 we have eliminated many varieties which we have considered to be surpassed by later introductions.

They belong in the rock garden where they thrive and increase if left in the ground from year to year. Plant them in groups of six to twelve bulbs among the rocks in fairly well drained pockets. We have eliminated all varieties of inferior and poor blooming qualities, and only those varieties that have given satisfaction under American conditions have been listed.

Narcissus or

In order to have a beautiful bulb garden, Narcissi should be planted freely. They thrive in practically any climate in the United States, and are not only excellent for outdoors, but millions are used every year for forcing indoors. Their graceful form, exquisitely shaped cups and trumpets, and long, straight stems have made them favorites for cut flower purposes with every American gardener. We have added many new varieties to the old favorites. For a real revelation, you should try some of the new types. They are really exquisite.

The Botanical terms: Incomparabilis, Leedsii and Barri, formerly used to classify Narcissi, have been discontinued, because, through the cross-breeding of the different varieties, it is now almost impossible to judge which Narcissi belong in which classification. The nine new classifications listed below will be easier to understand:

- (1) Trumpet Narcissi: trumpet as long or longer than perianth segments. May be self-colored or bi-colored.
- (2) Long-Cupped Narcissi.
- (3) Short-Cupped Narcissi.
- (4) Double Narcissi.
- (5) Triandrus Narcissi: three or more bell-shaped flowers per stem.
- (6) Jonquil Narcissi: three or more small flowers per stem. Flowers but-tercup-yellow, and very fragrant. Long rushlike foliage.
- (7) Poetaz Narcissi: cluster-flowering type, with 6 to 12 flowers per stem.
- (8) Poeticus Narcissi: having white perianth with red eye. Always fragrant.
- (9) Species and wild forms.

Autumn-Flowering Iris

(Flowering Two or More Times Each Season—Both Spring and Fall.)

We take great pleasure in offering this list of the finest fall bloomers in cultivation. While best results are secured with these Iris below the Mason-Dixon Line, with a little care we have obtained excellent fall bloom in Michigan. Some of the varieties listed not only bloom profusely early in the spring, but under favorable conditions also produce crop after crop of flowers in late summer and fall. There are as yet comparatively few of these Iris in existence, and the demand has been so great that we, as well as the few growers of fall bloomers, could fill only a small portion of the orders received last year. Please order early.

Vitaloam

The FIRST 100% ORGANIC SOIL CONDITIONER

We recommend VITALOAM because we use it at our own nursery. You can use it for all purposes, house plants as well as any outdoor plants, bulbs and bushes.

Do not sprinkle on top of ground but mix it through the soil where you are going to plant and also mix through the soil for growing plants.

As small shipments are too expensive for freight charges in proportion to the shipment we cannot offer less than full bag lots (1 bag 80 lbs.) 2 bags of 80 lbs. each will be shipped for nearly the same charges.

VITALOAM IS DIFFERENT and BETTER BECAUSE . . .

VITALOAM contains NO CHEMICALS—Will Not Burn roots or foliage. VITALOAM is not a commercial fertilizer—it is 100% ORGANIC. Simple to use, you cannot use too much.

VITALOAM does not wash away. Only one application of VITALOAM is required during a planting season. Once used you need not repeat during the season. That's why VITALOAM is so economical.

VITALOAM gives the soil the essential elements to feed plants organically for quicker growth and more abundant crops. Does not cause over-acidity or over-alkalinity.

VITALOAM permanently improves the condition of the soil. So, each planting season you use less VITALOAM—another reason why it is so economical.

VITALOAM gives the soil tremendous capacity for moisture-holding, making it possible for a continuous process of soil rejuvenation through this feeding.

VITALOAM's humus base and added cultures gives plants strength to repel insect and mold infection for healthier crops.

VITALOAM has no odor. It contains no animal waste or sewage.

VITALOAM is pleasant to handle; it's sweet and clean; powdered fine and velvety to the touch.

1951 Tulip Time Festival Dates, May 16th through 20th. Blooming period for our Tulips, the month of May. Visitors Always Welcome.

Mr. W. A. Carlisle Jr., from Onalaska, Washington, writes: . . . "In closing, may I say that our Tulip beds were the cynosure of all eyes, last May. People came to our home, asking if they might see the wonderful Tulips they had heard about. We always let them walk through the grounds to admire these marvelous Nelis Tulips, because we feel that half the joy of growing wonderful flowers lies in sharing their beauty with others. Your Tulips are the most magnificent we have ever grown, and since buying our first Nelis Tulips, years ago, we go nowhere else for our bulbs. After all, one cannot improve upon perfection."

Mrs. Dean Skeeters of Lafayette, Indiana, writes: "A note to say how pleased we were with the Tulips we bought of you last year. They were the talk of the neighborhood, so pretty and big."

Mrs. W. Nothnagel of Green Lake, Wisconsin, writes: "For several years now we have sent for your bulbs. They are always so good and the blooms are beautiful. We enjoy them so much."
